Arcade Mod:- Arcade Mod is an interesting option as it has to complete about 20 rounds with the strongest and also weekly opponents. The beginning of the fight will confront you weekly opponents, but as you go further by defeating them. The strongest warriors will face you one after the other, and the last will be the Mighty One who will fight with you. In this game, if you complete an arcade battle or any missions so you won't be rewarded for that completeness, but on the contrary, you're listed as rank 1 or 2, whatever you're able to stand for, and this list is global list of leaderboards, if you're ranked on top 10, so it's really really a big deal. Team Battle Mod:- Team Battle Mod is totally on your choice. You can choose the team that will be your enemy, and you can choose the team that will be your heroes. In this fight mod you can fight between these anime characters that you want to see in a fight in real animes. If you are a Dragon Ball fan, so it will drive you crazy because it is a Goku Black with full and all the original attacks like first is his hand sword attack with the super saiyan transformation that will crush the enemy and secondly is super saiyan rose hand sword attack, it is the attack that was used on Goku Blue by Goku Black and after this Goku Blue was unable to fight again with Goku Black, so yes, this game has this kind of original massive attacks. The third and final attack is super saiyan rose pink Kamehameha. This is the last attack of Goku Black, which takes almost half of the opponent's life. This Apk also has Gohan Super Saiyan with its original Kamehameha attack and automatic combo attack. Friend, here in this game available Naruto all shapes. Naruto has its original duplicate Attack and the first attack is hand-energy ball attack. Then there are transformations, then it is so realistic. The first transformation is Super Naruto, when the Naruto is surrounded by red aura and in this form Naruto becomes stronger, even in a game with its original features and Transformation is like a cat when he has 4 legs and 2 wings, in this form he uses great energy ball as his ultimate attack. After this Naruto turns into a golden form that has impressively massive attacks, those attacks called ultimate attacks in its base and earlier forms now they called normal movements in this Golden Transformation of Naruto and the final transformation is Naruto Golden Aura with the strongest attacks of all.
